PROFESSIONAL SUMMARY

AI Architect / Engineer with 15+ years building enterprise platforms and now specializing in deterministic, auditable Agentic AI systems. I lead cross-team architecture and technical strategy while staying deeply hands-on, modernizing complex legacy estates and building greenfield platforms for 20+ global clients, shipping production features daily. I design multi-agent orchestration, multi-model validation, and modern agent interoperability patterns (MCP, A2A) that bring reliability (controls, confidence, governance) to real-world AI workflows.

CORE COMPETENCIES

Engineering Leadership	System Design & AI	Platform & Infrastructure
Technical Strategy & Architecture Roadmaps	Microservices & Event-Driven Architecture	Python · TypeScript · Node.js · C# · React
Cross-Team / Cross-Continent Delivery	Distributed Systems & Scalability Patterns	FastAPI · Pydantic · Kubernetes · Docker
Platform Migration & Modernisation at Scale	API Design (REST, OpenAPI, WebSockets)	MongoDB · PostgreSQL · Redis · Kafka · NATS
Mentoring Senior Engineers & Building Teams	Deterministic & Agentic AI Architecture	Azure · AWS (Lambda/ECS/S3) · CI/CD Pipelines
Stakeholder Management & Capacity Planning	MCP, A2A & Agent Interop Protocols	LLMOps, Evaluation Harnesses & Observability

PROFESSIONAL EXPERIENCE

AI Architect | 12IQ Inc., Essen, Germany — Nov 2025 - Present

- Leading architecture and end-to-end development of a large-scale Deterministic AI platform focused on predictable, auditable, and intelligent workflows.
- Architected a modular, execution-driven AI system with a single deterministic execution spine, coordinating orchestration, context management, knowledge processing, reasoning, and multi-model validation.
- Designed agent orchestration patterns enforcing execution order, context propagation, budget control, fault isolation, and confidence scoring.
- Implemented MCP-based tool integration and A2A agent communication protocols for cross-system interoperability.
- Enforced security and compliance standards aligned with ISO 27001 and GDPR, including RBAC, secrets vaulting, audit logging, and data isolation.
- Built workflow automation pipelines using n8n for scheduling, event-driven triggers, data routing, and agent orchestration.
- Built multi-database AI infrastructure (relational, document, graph, vector, cache) to support persistent reasoning state and continuous learning.
- Hands-on Python lead, defining core abstractions, data contracts, and CI/CD standards.
- Leading technical delivery, interviewing, mentoring, and guiding engineers and interns.

Freelance Consulting & AI Engineering | Independent, Essen, Germany — Dec 2024 - Oct 2025

- Transitioned into AI Engineering through Masterschool Institute of Technology, Berlin, followed with independent freelance-style project execution.
- Designed and engineered three AI platforms (mainly Python): Med AI (Healthcare Automation), MASX AI (Geopolitical Forecasting), and Echo AI (Personal AI Clone).
- Delivered functional AI prototypes showcasing expertise in multi-agent systems, real-time data pipelines, RAG architectures, and LLM integrations.

Senior Software Engineer | IHS Markit (now S&P Global), Essen, Germany — Jul 2017 - Nov 2024

- Owned platform migration and project delivery across backend/frontend, leading team of 5+. Aligned with global stakeholders across 3 continents.
- Engineered secure, async-ready APIs and dashboards using Python, C#, Node.js, and AWS (Lambda, ECS).
- Migrated 10+ legacy applications to AWS and Angular, reducing latency by 40% and accelerating deployment cycles by 60%.
- Built CI/CD pipelines using GitLab, Docker, and Azure DevOps, cutting deployment errors by over 60%.

Software Engineer | IHS Markit, Essen/Leverkusen, Germany — Mar 2012 - Jul 2017

- Delivered digital analytics systems for enterprise automotive clients across 7 continents.
- Developed scalable analytics platforms using C#, VB.NET, serving 20+ global clients.
- Ensured data integrity and continuous system enhancements through cross-functional collaboration.

Software Engineer | Pitney Bowes Software, Noida, India — Nov 2009 - Feb 2012

- Developed reusable geospatial components for MapInfo MapXtreme GIS SDK used by enterprise clients worldwide.
- Built and maintained a high-volume automated testing framework, reducing regression test cycles by 50%.

KEY AI PROJECTS

Galileo Arena: LLM Benchmarking + Quality Controls https://galileo.masxai.com/

Multi-model evaluation platform with hybrid scoring engine (deterministic + ML), automated content generation, human-in-the-loop approval via Telegram, and social media distribution. Dynamic model registry, 10+ analytics visualizations, Dockerized deployment.

Repo: github.com/AteetVatan/AIGalileoArena

EchoAI: Real-Time Voice-Driven Agentic Intelligence https://ateetclone.masxai.com/

Voice-first AI clone with real-time STT to RAG memory retrieval to LLM reasoning to TTS.

Repo: github.com/AteetVatan/echo-ai

MASX AI: Strategic Autonomous AI System https://forecast.masxai.com

News ingestion, agentic reasoning and forecasting. 3 microservices: Hotspots (flashpoint + feed), GeoSignal (data ingestion + enrichment), Forecasting (reasoning engine).

Repo: github.com/AteetVatan/masx-hotspots | masx-geosignal | masx-forecasting

MedAI: Clinical Speech & Documentation Platform

Real-time clinical intake + documentation backend for German-speaking clinics: speech-to-text, medical entity recognition, LLM generation, orchestrated as an agentic pipeline.

Repo: github.com/AteetVatan/medai.git

ShotGraph: Multi-Agent Story-to-Video Pipeline

Stories to cinematic videos via LLM scene planning, diffusion-based image generation, TTS narration, and FFmpeg composition.

TECHNICAL SKILLS

Languages	Python 3.10+, TypeScript, JavaScript, C#, SQL
AI & Agentic	LangChain, LangGraph, AutoGen, CrewAI, MCP, A2A, n8n, RAG, PyTorch, Prompt Engineering
Backend	FastAPI, Pydantic v2, Node.js, REST/OpenAPI, WebSockets
Frontend	React, Angular (v15-17), Tailwind, Streaming UIs
Databases	MongoDB, PostgreSQL, Redis, Vector DBs (Chroma, FAISS, Pinecone), SQL Server
Cloud & DevOps	Azure, AWS (Lambda/ECS/S3), Kubernetes, Docker, GitHub Actions, GitLab CI
Security	ISO 27001, GDPR, Data Isolation, RBAC, Secrets Management, Audit Logging
Event Streaming	Kafka, NATS, Airflow, Redis Pub/Sub
LLMOps	LangSmith, TruLens, RAGAS, Cost Tracking, Prompt Versioning

EDUCATION & CERTIFICATIONS

AI Engineering Specialization -- Masterschool Institute of Technology (2025)

M.Sc. Geographic Information Systems -- Symbiosis International University (2007-2009)

B.Tech. Information Technology -- GGSIPU, New Delhi (2001-2005)

Certifications: AI Engineering (Masterschool, 2025) · PCEP Python (2025) · Certified ScrumMaster (Scrum Alliance, 2019)

Languages: English (Native) · Hindi (Native) · German (B1)
